

S. JOKUZYS PUBLISHING-PRINTING HOUSE

SAULIUS JOKUZYS

WE ARE 20 YEARS OLD

We were the first private publishing-printing house established after Lithuania gained independence. We started from scratch and through 20 years of hard work we grew and improved. Now our printing house is one of the biggest in Western Lithuania.

While celebrating this anniversary our goal hasn't changed: we strive to improve, offer the highest quality services to meet our clients' expectations. We believe that our greatest values are: experience of our qualified employees, constantly updated and modernized equipment and implementation of the newest polygraphic technologies.

Our success doesn't depend on us only. Having a great team of employees we are also sincerely glad to have reliable suppliers that provide support: UAB „Heidelberg Lietuva“, UAB „Hostmann Steinberg Lietuva“, UAB „Libra Vitalis“, UAB „Kolorita“ and others, logistic companies that deliver our products according to schedules: UAB „DPD Lietuva“, UAB „TNT“, UAB „Itella Logistics“, banks and leasing companies that provide financial support because they believe in our success: AB Šiaulių bankas, UAB „Nordea lizingas“ and others.

I wish you happiness and success!

Saulius Jokuzys
Owner

ABOUT US

- S. Jokužio publishing-printing house was established on October 11, 1990.
- We implemented ISO 9001:2008 Quality Management System and EFQM Excellence Model in 2003
- We are the only company in the Baltic States that has implemented a licensed „MetalFX“ technological system and has practice using it
- The enterprise is a member of Klaipeda Chamber of Commerce, Industry and Crafts, Klaipeda Association of Industrialists and Printers' Association of Lithuania

OUR ADVANTAGES

Our biggest advantage is that we have implemented all three main printing techniques – offset, digital and screen. This lets us to be flexible, meet any need of our customers and accomplish consistent quality control. Print runs can be according to customer's needs – from 1 copy to tens of thousands. All processes (printing, publishing, design, photography, pre-press reproduction, post-press operations) – from idea to product delivery – are done **under one roof**.

ACTIVITIES

PRODUCTS

S. Jokužys publishing-printing house prints catalogues, all types of calendars, books, albums, posters, flyers, booklets, diplomas, tickets, labels, notepads, folders, packaging, company forms, business cards, various envelopes, stickers, etc.

OFFSET PRINTING

We mostly print with „Heidelberg“ printing machines „Heidelberg“ SM52 - 5+L, „Heidelberg“ SM74 - 5+L that are manufactured in Germany. This equipment is renowned for its quality and is leading the printing industry. The advantage of our equipment is that the machines have an additional varnishing section which shortens the drying time of the dye as well as adds beauty to the finished product. This allows us to do all the post-printing jobs (folding, binding and others) quicker and our customers to receive the products of the highest quality in shorter times.

DIGITAL PRINTING

To fully satisfy our clients needs the printing house purchased a digital printing machine XEROX DC 800AP in 2009. **Digital printing** is the most modern printing technology that allows to print small runs in a very short time. The data is sent directly to the printing machine without additional operations, the view is formed from the digital description. Digital printing saves time and money.

DIGITAL

PRINTING

THE MOST MODERN PRINTING TECHNIQUE

that allows to print various products in the amount needed. When compared to offset printing, digital printing is simpler, because no forms are needed, the machines don't have to be specially prepared. The data is sent directly to the printing device without intermediate operations and the view is formed from the digital description. It is used for small runs – just form one copy. That's why you can print as much as you need, when you need it.

ADVANTAGES OF DIGITAL PRINTING

- SIMPLE PRE-PRESS PREPARATION
- TIMELINESS
- SMALL RUNS (FROM 1 TO 500 COPIES)
- VERY HIGH QUALITY (2400 X 2400 dpi)
- POSSIBILITY TO PERSONALIZE THE PRINTED INFORMATION
- EASY TO CHANGE INFORMATION

Offset printing

- Best for large runs. The more copies you print, the lower is the price per copy.
- Printing might take several work days.
- A full colour palette and semitones are produced using CMYK colour coding system (cyan, magenta, yellow, black).
- Pre-press, colour division and manufacture of forms, machine preparation is needed for printing.

Digital printing

- Best for small runs.
- You can get your printed materials in just one work day.
- Full colour view is produced by using colourful powdered dye coded to CMYK colour coding system.
- Very easy to prepare the layouts for printing (even Word, Excel and other office programs can be used), so expenditure on design is kept to a minimum.
- Multi-page materials can be digitally printed (catalogues, books, portfolio, company presentations, etc.). It is very convenient when you need small amounts and want to save money.

ACTIVITIES

THERMOGRAPHY

We constantly strive to improve and satisfy the need of our customers, so we search for novelties and present them to the market. Our printing house was the first one in Lithuania to successfully implement and use one of the most unique printing technologies – thermography. It creates elevated elements similar to Braille writing and your publication becomes unique. This type of publications is classified as VIP.

SCREEN PRINTING

Screen printing is the oldest printing technique that is still used today. This technique is great for non-standard printing decisions, unique projects. Colour view is formed by printing each colour separately. The full colour palette and all semitones are produced by small dots, called Bitmap. It is not necessary to use all CMYK colours. Wonderful products are created using three, two or even one colour. Business cards, company forms, stickers, envelopes are printed by solid government agencies, companies, community organizations, that is everyone who cares about quality, prestige and image. The unique feature of screen printing is the possibility to print on any surface.

METALFX –

S. Jokužys publishing-printing house is the only company in the Baltic States that has implemented a licensed „MetalFX” technological system and has practice using it. It is the newest and unique technology for a five colour press that gives you a possibility to use an unlimited amount of metallic colours. It creates opportunities for breathtaking designs for designers and a system to easily realize those designs in printing. The price is no greater than using any fifth colour and manufacture time is no longer than printing of any five colour product. Metallic colours are not an item of luxury anymore – they are just an element of the world of printing.

S. JOKUŽIO

**LEIDYKLA-
SPAUSTUVĖ**

ACTIVITIES

PRE-PRESS

S. Jokuzys publishing-printing house uses modern pre-press CTP technology to prepare layouts for printing. We implemented a modern open modular „Heidelberg“ PRINET system to easily control the full printing process. PRINET integrates the traditionally separate areas of management, prepress, press and post-press, automates the entire printing process. Integration of all these processes leads to more efficient production workflows, offers greater transparency, and accelerates the job flow.

DISTRIBUTION DEPARTMENT

In 1997 the printing house established a distribution department to supply various shops and bookstores with our standard printed products: calendars, books, various accounting books and forms, etc. It supplies around 60 companies in Lithuania.

PHOTO STUDIO

We have established a photography studio for your convenience in 2006 and now it is one of the biggest and most modern photography studios in Klaipėda. A team of professionals creates unconventional photos of the highest quality for commercials, reportages, personal albums and other. We work with professional CANON photographic equipment, computer software and other photo accessories. More information at:

www.kalendoriai.lt, www.fotovaiva.lt

BUSINESS VITAMINS

VITAL REACTIONS ARE NECESSARY FOR YOUR COMPANY'S ORGANISM SURVIVAL AND THEY ARE PROVIDED BY „BUSINESS VITAMINS“! THE RECIPE FOR YOUR COMPANY'S SUCCESSFUL EXISTENCE:

BUSINESS CARDS – it is vitamin **A** for beauty and vision that helps to create a good impression about your company and the card's owner. It is said that a person is valued according to appearance and a company – by it's business card.

NOTEPADS, NOTEBOOKS – vitamin **E**, a supplemental vitamin to vitamin A, for beauty and good condition of the company. You will feel calm in meetings, presentations and other events while representing your company and creating an image of prestige.

CATALOGUES, BROCHURES – a vital vitamin **C** that strengthens the immune system, that is stimulates your potential customers' interest and helps promote your products to effectively adhere to your clients needs.

BOOKLETS, FLYERS, POSTERS – **B** group vitamins to activate the „blood flow“ of the company.

POSTCARDS AND INVITATIONS – a complimentary part of **B** group vitamins that soothes and promotes healing – a pleasant and warm expression of attention to your relatives, colleagues and business partners.

COMPANY FORMS, ENVELOPES, FOLDERS – vitamin **D** that provides form and solidity, used not only for packaging or document storage, but as well as a great and convenient advertisement space of your company.

COMPANY RECIPE

Business vitamins – these are vitamins for your company to strengthen the „organism“, provide solidity, energy and self confidence.

DON'T FORGET that it is recommended to consume vitamin complexes as they are more easily absorbed than when using them separately!

 VIP – WITH VARIOUS POST-PRESS
 WORKS

BUSINESS CARDS

A business card is a reflection of your company's style. At any official meeting, be it business people, scientists or artists, it is customary to present oneself and your company and give short information by presenting a business card. A business card is one of the most popular and used marketing materials. Classical size is 6 x 9 cm, but the most popular size in Lithuania is 5 x 9 cm. It is very important to keep harmony of forms and colours on the card.

NOTEPADS (IN CUBES)

Notepads are very convenient for writing short notes or during seminars. They can be glued on one side or packed into a plastic box.

COMPANY FORMS

10001
00100
11100

Company forms are used not only for daily work activities, but as an additional advertising material as well.

FOLDERS

10001
00100
11100

Folders are aesthetical and functional covers for blanks and other documents. Various information can be printed on them, also it is very easy to change or add additional information inside. You can print pricelists or other technical information on a standard office printer, make many copies and beautifully pack them in the folder thus giving a nice impression to your clients.

ENVELOPES

10001
00100
11100

Isn't simply packaging for your letters – envelopes can be great commercial materials that remind your customers about your company.

BUSINESS VITAMINS

INFORMATION

CATALOGUES

10001
00100
11100

Edited and printed publications that include big amounts of information. Catalogues can contain numerous information, pictures of your products, etc. You can present your company, products or services, familiarize your potential clients with all the technical characteristics of your products or services, etc. Catalogues are usually distributed by mail or given directly to customers. They can be not only for advertising purposes, but used as information presentations to your existing clients with all the complicated technical data, specifications, pictures of parts and other. They are very useful when there is a lot of information to present, your company has several lines of production or works in multitude of fields.

NOTEBOOKS

10001
00100
11100

Notebooks of original design can be a great gift, advertising material given at seminars or conferences, etc.

FOR EVERY DAY

FLYERS

Flyers are small size advertising materials printed in large quantities. Flyers contain information on specific services, products or events. They should be designed in brighter colours, have short advertising texts or slogans. Flyers are usually distributed by mail, with other printed materials or simply given to people on the street. They reach a wide audience of potential clients.

POSTERS

Posters - an attractive advertising material that uses mainly visual stimulation. Main attention is directed to the images on the poster, so text should be kept to a minimum. Posters are used to announce information about events, as advertising material, etc.

Formats: A3, A2, B3, B2, B1 and others.

OCCASIONAL PRODUCTS

PHOTO BOOKS

A photo book is a great choice if you wish to perpetuate your or your family members' artwork. It can be prose, poetry or drawings. Give a special gift to your loved one. One of the most pleasant ways to spend your free time is to look through photographs and show them to relatives and friends. Photos show the way we looked when we were kids, how our parents and grandparents looked when they were young. Unfortunately photos get old, change colour and get lost among other things...

Modern technologies can make your dream to renew, arrange, catalog the photos in chronological order come true. Today everyone has a digital camera and thousands of photos. Our unique offer for you – photo books.

PHOTO BOOKS

PHOTO BOOKS FOR EVERYONE:

Children, travels, family, school, kindergarten, pets, weddings, christenings, birthday parties, photography, sports, fishing, Mother's Day, Father's Day, Valentine's, bachelor/bachelorette parties.

PROFESSIONAL PHOTO OR ART BOOKS:

Photography albums, portfolios, weddings, art works, model portfolios, reproduction catalogues for galleries.

COMPANY PHOTO BOOKS:

Company presentation, product catalogues, history, company events.

FORMATS:

30x30, A4 vertical, A4 horizontal, A5 horizontal

COVER HOLES:

Square, rectangle, circle, oval

COVER COLOURS:

Standard colours: black, silver, gold, navy, white.

PACKAGING LABELS AND OTHER

BOXES

Packing material with company logos. Suitable for all types of products as well as business gifts and representational calendars.

PAPER BAGS

Paper bags with company logos suitable for business presents, conferences, seminars, exhibitions, clothes, cosmetics, jewellery, bottles.

CANDY WRAPS

Candy wraps with names, birthdates – an original idea to surprise your relatives and friends.

OCCASIONAL PRODUCTS

COASTERS

Coasters are used to protect the table from hot cups. They are very useful as well as a great advertising material. They will be used on coffee brakes at work or at home.

DIPLOMAS, CERTIFICATES

Diplomas and certificates are used to validate wins, achievements, give guarantees or express gratitude. They can be nominal or from our database of templates.

TABLE CARDS

Table cards are a necessary attribute of the modern event table. Table cards created according to your event's style are convenient as well as a sign of attention to your guests.

FOR ALL NEEDS

ADVERTISING STANDS

It is a very popular means of advertising. Very helpful when announcing sales and discounts as they are visible from far away.

PAPER COVERS FOR BOOKS

Very useful if you wish to preserve your new book's or renew those dear old book's cover. Manufactured in various sizes, formats and design.

MAGNETS

Magnets are advertising souvenirs with metal surface that are hung on refrigerators or other metal surfaces. You can keep your notes in place with them and they will always be in sight. Magnets with your company information won't let your customers forget about You.

Offset
printing

Digital
printing

OTHER PUBLISHINGS

EMPLOYEE ID

Employee or visitor ID's are necessary for companies with restricted area access. We can manufacture ID's with employee photos, company's logos and other information. Most of the companies have employee cards, present participants of various events with participant's cards and clubs provide member ID's.

STICKERS

STICKERS CAN BE OF 2 TYPES:

Stickers can be a great long-term advertisement of your company. They can also be used as warning signs such as „Pull“, „Stop“ or information about the country (flag, country code), company (legal status UAB, „ABC“), event, product or service, etc.

1. Suitable for outdoor use: usually glued to cars, windows, storefronts, doors, walls, etc. Made in larger formats and are more expensive because the materials used for their manufacture are resistant to humidity, temperature variation, fading, etc.

2. Suitable for indoor use: glued on furniture, machinery, inside doors, books, etc. These stickers are printed by offset or digital presses.

FOR ALL NEEDS

MENU

Menu is the „business card“ of the restaurant. They can be made in various sizes, colours, uniquely bound. Most of the clients form an opinion about the restaurant according to it's menu.

LASER CUTTING

Laser cutting is widely used: from simplest cards, invitations, advertising pages in catalogues, journals, on menus to the most complicated products – packaging, event decorations, table decorations, etc.

CD-DVD STICKERS

CD-DVD stickers are used on the company's representational materials. We can create designs with your photos, logos and other information.
